OBJECTIVE

Software Engineering Intern with experience developing scalable backend services, AI-powered chat systems, and cloud-based apps. Worked across full SDLC and supported product delivery for live platforms. Skilled in Python, FastAPI, Node.js, SQL, and DevOps practices. Seeking a developer role to build secure, scalable, and impactful applications.

WORK EXPERIENCE

SDE Intern

Aug 2025 – Present

Silo Fortune, Bengaluru

- Contributed to **Haatak**, a digital gold investment platform, Built the 'My Wealth' API service using **FastAPI** and **PostgreSQL** to help users monitor their gold holdings and track investment growth over time.
- Designed and built **JameendarX**, a real estate management system,
 - Designed and developed an end-to-end property management platform handling listing workflows, sales pipelines, and customer lifecycle management
 - Payment Infrastructure: Integrated Cashfree gateway and engineered a custom installment engine with flexible restructuring capabilities, enabling administrators to modify payment schedules and recover lapsed transactions
 - KYC Verification Module: Built a dual-interface identity verification system with admin-assisted document processing .
 - Implemented role-based access control (RBAC) and secure authentication, ensuring compliance with data protection standards
- Built and Deployed a **RAG-based chatbot backend** that provides assistance in navigating **Karnataka Forest Department** schemes and regulations using FastAPI and Langchain for the vector Embedding for more meaningful search .
- Developed and deployed **REST APIs** for an AI-powered customer support chatbot using **FastAPI**, improving website navigation and user engagement by 12%.

SKILLS

Programming Languages	Java, Python, SQL, Basic JavaScript
Web Technologies	HTML5, CSS3
Development Tools	Jupyter Notebook, Git, Eclipse, MySQL, SQLite, JDBC

PROJECTS

Aduitcode - Code Editor and AI Assistant

- Proposed a project aimed at streamlining the teaching-learning process for both lecturers and students.
- Engineered an in-software AI Assistant powered by Ollama, facilitating comprehensive contextual conversations and streamlined coding problem-solving.
